

NEXT Testing

This season the Mass Satellite Training Program has teamed up with a new and exciting athletic testing program, **Next Testing**.

Next Testing has developed a comprehensive sport specific athletic testing program to provide recruiting organizations and athletes with tools for understanding performance.

As a trusted and independence standard that incorporates the best of sport and science, the Next Testing Program will provide information and tools to augment the experienced eyes and hard earned instincts of recruiters and Strength and Conditioning professionals.

Simply put, better information will lead to better decisions. Participating athletes will experience a test battery that spans five critical domains, ***biometrics, physiology, cognition, skills, and intangibles***.

Player selected to the STP will begin the program with the mandatory formal customized testing program conducted by Next Testing April (see schedule) at Foxboro Sports Arena.

Festival players not selected will be offered the opportunity to be tested based on availability of open positions determined by the MA STP and Next Testing for a discounted rate.

For more information about this new testing program check them out at <http://www.nexttesting.com/>
